KELSO'S
INTEREST AND DISCOUNT
TABLES

KELSO'S INTEREST AND DISCOUNT TABLES.

On January 27th, 1872, JOSEPH B. MOORE, Esq., of the First National Bank, Detroit, examined, critically, advance sheets of the above tables, then in course of preparation, and endorsed thereon his opinion, of which the following is an extract:

"They will supply, in a very satisfactory manner, all the requirements of Bank and General business."

With which opinion the following gentlemen concurred:

EMORY WENDELL, Esq., Cashier First National Bank; C. M. DAVISON, Esq., Cashier Second National Bank; EDWARD KANTER, Esq., President German American Bank; S. D. ELWOOD, Esq., Secretary and Treasurer Wayne County Savings Bank; Messrs. F. L. SEITZ & Co., and DAVID PRESTON, Esq., Bankers; Messrs. NEWBERRY, POND & BROWN, D. B. and H. M. DUFFIELD, and MOORE & GRIFFIN, Lawyers. C. M. GARRISON, Esq., President. G. W. BALCH, Esq., First Vice President, and RAY HADDOCK, Esq., Secretary and Treasurer of the Detroit Board of Trade.

ENTERED ACCORDING TO ACT OF CONGRESS, IN THE YEAR 1872,
BY SAMUEL J. KELSO,
IN THE OFFICE OF THE LIBRARIAN OF CONGRESS,
AT WASHINGTON.

P R E F A C E .

These Tables will be found "To supply, in a very satisfactory manner, all the requirements of Bank and General Business." [See inside of cover.]

They are computed on a basis of both **360** and **365** days per annum. Contain just FORTY-EIGHT pages of Tables, and no more, as follows :

TABLE A, 13 PAGES, 360 DAYS PER ANNUM.—From this Table may be found, within the space of less than *one half inch*, the interest at 8 per cent. on any sum of money, for any given time, within one year.

TABLE B, 1 PAGE, 360 DAYS PER ANNUM.—Gives, within a like small space, the interest at 8 per cent. on any sum of money, for any number of years, from one to twenty.

TABLE C, 5 PAGES, 360 DAYS PER ANNUM.—Supplies the interest at 6, 7, 9 and 10 per cent.—any sum of money. Time, from 1 day to 5 years.

TABLE D, 26 PAGES, 365 DAYS PER ANNUM.—Gives the interest on any sum of money not exceeding \$99,999, at 6, 7, 8, $8\frac{1}{2}$, 9, and 10 per cent.

TABLE E, 3 PAGES, 365 DAYS PER ANNUM.—Is a Table supplementary to Table D—giving the interest on any sum of money at $7\frac{3}{8}$ per cent. for any time from 1 day to 3 years.

The peculiar construction of these Tables may be briefly described as follows, to wit :

The interest on 1, 2, 3, 4, 5, 6, 7, 8 and 9 dollars is given in small, half inch compartments, for every period within an extended range of time, and for such varied rates of interest as appear to be of any practical utility.

From these the interest on any given principal sum whatever, with the limitation mentioned above regarding Table D, is written off without any change in the figures, as hereinafter fully illustrated.

SAMUEL J. KELSO, *Compiler*.

DETROIT, March, 1872.

EXPLANATION, EXAMPLES AND REMARKS.

The following are well-known principles in arithmetic :

1. Every principal sum of money is composed of a certain number of units, tens, hundreds, thousands, &c., of dollars. Thus the amount \$3764 is made up as follows:

3000—	3, Thousands	} of Dollars.
700—	7, Hundreds	
60—	6, Tens	
4—	4, Units	

2. The interest on any sum of money for any given time, and at any given rate, is the same as the sum of the items of interest computed for the same time and at the same rate on its component parts. Thus, the interest on \$235 for 1 year, at 8 per cent., is the same as the sum of the items of interest

on	\$200	for 1 year,
on	30	"
on	5	"

3. For any given time and rate the *same figures* express the interest

on	1,	10,	100,	1000,	10,000	Dollars
on	2,	20,	200,	2000,	20,000	"
on	3,	30,	300,	3000,	30,000	"
	&c.,		&c.,		&c.	

The only difference being the *position* of the point designating what portion thereof is fractional. Thus the interest

on	\$7	for 2 months	@ 8 per cent.	is	9.3333	cents."
on	\$7000	" 2 "	@ 8 "	is	9333.3	"

With these axioms in mind, the following GENERAL RULE for using these Tables will be perfectly intelligible:

1. Find the half-inch compartment for the time and rate.
2. Find in that compartment in the "\$" column the number of "UNITS" in your principal. The Tabular number opposite to it (just as you find it) is the interest on the "Units" of your principal *in cents and decimals of a cent.*
3. Find in same column the "TENS" in your principal. The Tabular number opposite to it (with the decimal point moved one place to the right) is the interest on the "Tens" of your principal, *in cents and decimals of a cent.*
4. Find in same column the "HUNDREDS" in your principal. The Tabular number opposite to it (with the decimal point moved two places to the right) is the interest on the "Hundreds" of your principal, *in cents and decimals of a cent.*
5. Continue in this manner for the "THOUSANDS," "TENS OF THOUSANDS," "HUNDREDS OF THOUSANDS," "MILLIONS," &c., of dollars in your principal (moving the point one place to the right each time). The aggregate of the results so obtained will be the required interest on your given principal, *in cents and decimals of a cent.*
6. Disregard the decimal part and point off two places of the whole number, and the result is the required interest in *Dollars and Cents.*

It requires much less time to perform this operation than it does to describe the manner of doing it, as will appear by the examples which follow.

N. B.—The decimals in Tables *A* and *C* repeat, viz., the last figure of each may be repeated to infinity. In Table *B* the Tabular Interest is in cents—no decimals. In Table *D* the decimals *do not* repeat (hence the necessity of the limitation to \$99,999). In Table *E* the decimals are finite—giving the exact interest in every case for any principal.

INTRODUCTION.

7

EXAMPLES ON TABLES A AND B

For convenience of reference, the several compartments which it is necessary to refer to in the solution of some of the examples, are repeated on the margin.

From Table A, p. 19

1. Required Interest on \$387 for 2 months and 17 days
@ 8 per cent. [Compartment, p. 19.]

For	7	Interest is	11.9
For	80	"	136.8
For	800	"	513.3
Interest on \$387		is	662. -- \$6.62

2. Required Interest on \$900, same time and rate.

Interest on \$900 is 1539.9 -- \$15.40

\$	2.17
1	1.71
2	3.42
3	5.13
4	6.84
5	8.55
6	10.26
7	11.97
8	13.68
9	15.39

From Table A, p. 21

4. Required Interest on \$73 for 4 months and 14 days
@ 8 per cent. [Compartment, p. 21.]

For	3	Interest is	8.9
For	70	"	208.4
Interest on \$73		is	217. -- \$2.17

5. Required Interest on \$17,000 for same time and rate.

For	7000	Interest is	20844.4
For	100.0	"	29777.7
Interest on \$17000		is	50622. -- \$506.22

\$	4.14
1	2.97
2	5.95
3	8.93
4	11.91
5	14.88
6	17.86
7	20.84
8	23.82
9	26.79

From Table A, p. 26

6. Required Interest on 60 cents for 8 months and 13
days @ 8 per cent. [Compartment, p. 26.]

For \$6.00 83.73
Moving the point 1 place to *left* we have 3.37 -- about 3 1-3 cents.

7. Required Interest on \$7040 for same time and rate.

For	40	Interest is	224.8
For	7000	"	39355.5
Interest on \$7040		is	39580. -- \$395.80

\$	8.13
1	5.62
2	11.24
3	16.86
4	22.48
5	28.11
6	33.73
7	39.35
8	44.97
9	50.59

From Table B, p. 33

8. Required Interest on \$99 for 11 years @ 8 per cent.
[Compartment, p. 33.]

For	9	Interest is	792
For	90	"	7920
Interest on	\$99	is	\$712 = \$87.12

	\$	11 yrs
1	88	
2	176	
3	264	
4	352	
5	440	
6	528	
7	616	
8	704	
9	792	

(In using Table B we annex ciphers, where in other Tables we move the decimal point.)

N. B.—The best mode of computing interest for any given rate per cent. (360 days per annum) is to use Tables **A** and **B**. Find the interest for 8 per cent., and deduce the interest at other rates from that. Thus for 6 per cent. deduct $\frac{1}{3}$; for 10 per cent. add $\frac{1}{3}$, &c., &c.

EXAMPLES ON TABLE C.

9. Required interest on \$73 for 8 months and 7 days @ 6 per cent.

[Page 38.]	For 8 months on	3	12.
		70	280.
[Page 39.]	For 7 days	3	.3
		70	8.1
			300. = \$3.00

10. Required interest on \$450 for 13 days @ 7 per cent.

[Page 39.]	For	50	12.6
		400	101.1
	Interest on	\$450	is 114. = \$1.14

11. Required interest on \$250 for 11 months and 5 days @ 9 per ct.

[Page 38.]	For 11 months on	50	412.5
	"	200	1650.0
	For 5 days	50	6.2
	"	200	25.0
			2094. = \$20.94

12. Required interest on \$3700 for 27 days @ 10 per cent.

[Page 41.]	For	700	Interest is	524.9
	"	3000	"	2249.9
	Interest on	\$3700	is	2775. = \$27.75

Notwithstanding the brevity of the work, as illustrated above, we are of opinion that it would have been better to have used Table **A** (8 per cent.), as follows:

INTRODUCTION.

9

No. 9.—Compartment; page 25.

For	3	Interest is	16.4	
"	70	"	384.2	
			401.	— Interest at 8 per cent.
		Deduct $\frac{1}{4}$,	100.25	
			300.75	— \$3.00—Interest at 6 per ct. as before.

No. 10.—Compartment; page 16.

For	50	Interest is	14.4	
"	400	"	115.5	
			130.	— Interest at 8 per cent.
		Deduct $\frac{1}{2}$	16.	
			114.	— \$1.14—Int. at 7 per cent. as before.

No. 11.—Compartment; page 28.

For	50	Interest is	372.2	
"	200	"	1488.8	
			1861.	— Interest at 8 per cent.
		Add $\frac{1}{2}$,	233.	
			2094.	— \$20.94—Interest at 9 per ct as before.

No. 12.—Compartment; page 17.

For	700	Interest is	419.9	
"	3000	"	1799.9	
			2220.	— Interest at 8 per cent.
		Add $\frac{1}{4}$,	555.	
			2775.	— \$27.75—Interest at 10 pr ct. as before.

The reason of our preference for the latter mode of solution is that in Table *A* interest is given for every possible term in one year; while in the case of Table *C* interest is given for each of the four rates for 1, 2, 3 and 4 years; for 1, 2, 3, 4 to 11 months, and for 1, 2, 3, 4, 5, to 29 days, only—making it necessary, as in examples 9 and 11, to refer to two compartments to obtain the required interest; whereas, by using Table *A* and deducing the desired interest from the 8 per cent. interest, only one compartment has to be employed. As, however, Table *C* occupies only 5 pages, the necessity of referring to more than one compartment may not be regarded as objectionable.

EXAMPLES ON TABLE D.

13. Required interest on \$378 for 33 days @ 6 per ct.

For	8	Interest is	4.8
"	70	"	37.9
"	500	"	162.7

Interest on \$378 is 205. = \$2.05

14. Required interest on \$500 for same time and rate.

For \$500 Interest is 271.2 = \$2.71

15. Required interest on \$122 for same time and rate.

For	2	Interest is	1.0
"	20	"	10.8
"	100	"	54.2

Interest on \$122 is 66. = \$.66

From Table D.
p. 53.

	\$ 6 pr ct
1	.5424
2	1.0849
3	1.6273
4	2.1698
5	2.7123
6	3.2547
7	3.7972
8	4.3397
9	4.8821

From Table D, p. 60.

16. Required interest on \$99,999 (this being the highest number for which these Tables are available) for 63 days at 8 per cent.

For	\$9	Interest is	12.4
"	90	"	124.2
"	900	"	1242.7
"	9000	"	12427.8
"	90000	"	124273.

Interest on \$99,999 is 138080. = \$1,380.80

	\$ 8 pr ct
1	1.3808
2	2.7616
3	4.1424
4	5.5232
5	6.9041
6	8.2849
7	9.6657
8	11.0465
9	12.4273

From Table D, p. 62.

17. Required interest on \$195 for 72 days at 9 per cent.

For	\$5	Interest is	8.8
"	90	"	159.7
"	100	"	177.5

Interest on \$195 is 346. = \$3.46

	\$ 9 pr ct
1	1.7753
2	3.5506
3	5.3260
4	7.1013
5	8.8767
6	10.6520
7	12.4273
8	14.2027
9	15.9780

From Table D, p. 70.

18. Required Interest on \$7050 @ $8\frac{1}{2}$ per cent. per annum for 1 year and 300 days.

For	7000	for 1 year	59507.0
"	50	"	425.0
For	7000	for 300 days	48904.1
"	50	"	349.3

109178. — \$1,091.78

\$ 8½ %			\$ 8½ pr ct		
1 YEAR.	1	8.5	300 DAYS.	1	6.9863
	2	17.0		2	13.9726
	3	25.5		3	20.9589
	4	34.0		4	27.9452
	5	42.5		5	34.9315
	6	51.0		6	41.9178
	7	59.5		7	48.9041
	8	68.0		8	55.8904
	9	76.5		9	62.8767

EXAMPLES ON TABLE E

19. Required interest on \$730 @ $7\frac{3}{10}$ per cent. for 35 days.

[Page 73.]	On	30	Interest is	21.
	On	700	"	490.
				511. — \$5.11

20. Required interest on \$841 @ $7\frac{3}{10}$ per cent. for 60 days.

[Page 74.]	On	1	Interest is	1.20
	On	40	"	48.00
	On	800	"	960.00
				1009.20 — \$10.09

21. Required interest on \$5,000 @ $7\frac{3}{10}$ per cent. for 1 year and 199 days.

[Page 75.]	On	\$5000	for 1 year	36500.
	"		for 100 days	10000.
	"		for 99 days	9900.
				56400. — \$564.00

COMPARISON WITH OTHER TABLES

Of the many Books of Interest Tables hitherto published, two only are entitled to, and do receive the confidence of all classes of the business community. These are Price's and Bryant, Stratton & Packard's Tables. The others, of course, possess some little merit as a convenient auxilliary for the purpose of checking computations already made, and are often used by persons inexpert with figures who are obliged to avail themselves of them, and wade through their pages and up and down and across their columns to find the various items necessary to be added to get at the interest desired.

For example, to find the interest on \$5,732 for 11 months and 25 days at 8 per cent, by the aid of one of the best of these tables, we have to perform the following operation:

Page —, interest for	\$32	for 11 months,	\$2.35
" " " for	32	for 25 days,	.18
Another page —, " for	700	for 11 months,	51.83
" " " for	700	for 25 days,	3.89
Another page —, " for	5000	for 11 months,	366.67
" " " for	5000	for 25 days,	27.78
<hr/>			
Required interest,			\$452.20
Should be			\$452.19

Here we had to consult three different pages, and were obliged to run up and down and across the columns to get the above approximation to the correct interest.

By Kelso's Tables the same question is solved as follows. We give the "Compartment" in the margin:

For	2	15.7
"	30	236.6
"	700	5522.2
"	5000	39444.4]
<hr/>		
Interest on \$5732	is	45219. — \$452.19

\$11-25
1 7.88
2 15.77
3 23.66
4 31.55
5 39.44
6 47.33
7 55.22
8 63.11
9 70.99

Our object, however, is not to assert our superiority over such Interest Tables as the Book referred to; but to direct attention to the points of superiority which our Tables can be shown to possess over Price's, or Bryant, Stratton & Packard's Interest Tables. As Bryant, Stratton & Packard's Tables are obviously the best of the two, we will confine the comparison of our Tables with theirs.

B., Stratton & P.'s Tables.

1. *Limitation as to Amount of Principal.*

They give the interest on any sum from \$1 to \$100,000, on a basis of 360 and 365 days per annum.

2. *Number of Rates.*

They give the interest at the following rates on a basis of 360 and 365 days per annum, to wit:

1, 5, 6 and 7.

3. *Period of Time.*

They give the interest from 1 day to 4 years.

4. *Size, Weight, &c.*

1 foot 3½ inches by 10 inches; weighs about 3 lbs. 4 oz.; contains 184 pages of tables—1 page contains about 6 of Kelso's. The entire book contains upward of 8,000,000 of figures.

5. *Price.*

Formerly \$10.00
Reduced to 5.00
By Mail, - 6.00

6. *Accuracy.*

"Their correctness is beyond dispute, being vouched for by the leading financial houses of the country, and attested by the U. S. Treasury Department after thorough and rigorous examination, and * * Feb. 9, 1871, it was ordered by George S. Boutwell, Secretary of the Treasury, that Bryant, Stratton & Packard's Tables be used, as well as the one of Mr. Price."—Extract from advertisement.

Kelso's Tables.

1. *Limitation as to Amount of Principal.*

We give the interest on *any sum, whatever*, on a basis of 360 days, and on any sum from \$1 to \$99,999 on a basis of 365 days per annum.

2. *Number of Rates.*

We give the interest on a basis of 360 days per annum, at the following rates, to wit.

6, 7, 8, 9 and 10,

and on a basis of 365 days per annum, at the following rates, to wit.

6, 7, 7½, 8, 8½, 9 and 10 pr. ct.

3. *Period of Time.*

We give the interest, as follows:

Tables A and B,	1 day to 20 years.
Table C	1 " 5 "
Table D	1 " 2 "
Table E	1 " 4 "

4. *Size, Weight, &c.*

8 inches by 5¼ inches; weighs about 10 oz.; contains 48 pages of tables; 1 page about 1-6th the size of B., S. & Packard's. The entire book contains less than 60,000 figures.

5. *Price.*

\$1.50
By Mail, 1.50

6. *Accuracy.*

Our Tables are of such a character, not only on account of their unexampled brevity, but by reason of their peculiar construction, that any person may for himself test the accuracy of every figure in the Tables in a few hours, before adopting them for use (see page 14). And we have no doubt that before the end of 1872, the Secretary of the Treasury will order that Kelso's Interest and Discount Tables be used as well as the one of Messrs. Bryant, Stratton & Packard's.

From the above it would appear that they have us on the size, weight, number of figures and price, and that we have them on the other points.

A SUGGESTION.

Many persons have a habit of making the computation after ascertaining the interest from a book of interest tables, with a view to be doubly sure of accuracy. We would advise, as leading to a material saving of time and labor, that they shall, once for all, test, or cause to be tested, the accuracy of these Tables; or, at least, such portions thereof as in their peculiar line of business they are likely to be frequently called upon to use. Having tried them and found them trustworthy, let them make some mark thereon showing what Tables they had tested and found correct. Obviously they can use such portions with the utmost confidence hereafter, just the same as if each tabular interest was the result of their own individual computation.

The tests to be applied are as follows:

TABLE A.—Make the addition of each compartment, the total will be as many *cents* as there are *days* at the head of the compartment. The reason is that the total of each compartment is the interest on \$45 (the sum of the \$ column) for the number of days at the head of the compartment; but the interest at 8 per cent. on \$45 for *one* day is exactly *one* cent.

TABLE B.—Make the compartment additions as before, and see that the totals occur in regular rotation, as follows: 90, 180, 270, 360, &c., &c. to wit, an arithmetical progression, wherein 90 is the first term and common difference.

TABLE C.—Is similarly proved—the totals of the several compartments for the four different rates forming regular arithmetical progressions.

TABLE D.—Add to the tabular number to be tested one day's interest on same number of dollars at same rate—the total should agree with the tabular number in the succeeding compartment given for the same number of dollars, with a difference of perhaps *one* unit in the decimals.

Another method: Multiply the days on number of dollars, and divide the result by any of the nine figures (excepting the number representing the dollars), which will divide it without remainder; then call your divisor *dollars* and your quotient *days*, and find at the proper place on the tables the interest on so many dollars for so many days at the same rate; of course it should be the same as the original tabular number, the correctness of which it was desired to test.

TABLE E.—Run up the additions of the compartments and observe that the several totals, in regular order of the days, form the arithmetical progressing series, 90, 180, 270, 360, &c.

THE cut on this page is given to illustrate the systematic care exercised in the compilation of these Tables, to guard against the possibility of error.

The example is a *fac simile* of manuscript copy for the printer of the compartment giving the interest, on a basis of 365 days per annum, on 1, 2, 3, 4, 5, 6, 7, 8 and .9 dollars for 50 days at 6 per cent. See page 57, Table D.

\$											
50 DAYS AT 6%

45		36	.	9	8	6	3	0	1	0	

* The interest on \$1 is computed to 7 places of decimals, which is the 1st line; the 2d line is twice the 1st; the 3d line is the sum of 1st and 2d; the 4th line is twice the 2d; the 5th line is the sum of the 2d and 3d; the 6th is twice the 3d; the 7th line is the sum of the 3d and 4th; the 8th line is twice the 4th; and the 9th line is the sum of the 4th and 5th.

The interest on \$45 (the total of the "S" column) is then computed and found to agree with the sum of the 9 lines. As only four places of decimals are required, the superfluous figures are then ruled out, as shown in the cut. The accuracy of each Tabular Interest is again tested by comparison with a book containing the entire computations made by another and different process.

The original manuscript, in the form represented in the wood cut, is then set up by the printer, and, after the most careful correction, the form is electrotyped. Finally, proofs from the electrotyped plates undergo a rigid and most searching scrutiny.

Table A---13 Pages, 360 Days per Annum.

From this Table may be found, within the space of less than *one half inch*, the interest at 8 per cent. on any sum of money, for any given time within one year.
